

Regulation and monitoring of HVAC

For more than 45 years, Sauermann Group has designed, manufactured and sold products and services dedicated to the industrial and HVACR markets. The Group specifically focuses on the detection, measurement and control of indoor air quality (IAQ).

HIGH ACCURACY UNMATCHED RELIABILITY **MULTIPLE APPLICATIONS**

Measurement instruments: Sauermann measurement instruments monitor a broad spectrum of indoor air quality parameters and serve a wide range of applications, from building ventilation (heating and air conditioning) systems, to cold-chain installations and combustion gas analysis. Backed by our testing laboratories and in-house research and development programme, Sauermann instruments deliver the accuracy and reliability that HVACR engineers need.

LOW SOUND LEVEL **LOW FAIL RATE** HIGH PERFORMANCE Condensate management solutions: Safe and effective condensate management for air quality systems can be a challenge. Sauermann pumps are designed to look good, while our patented piston technology delivers whisper-quiet operation and unrivalled reliability.

Sauermann Industrie. Laboratories, located in Montpon (FR), accredited to standard **NF EN ISO/IEC 17025**

OUR EXPERTISE

ACCREDITED MEASUREMENT LABORATORIES, IN-HOUSE RESEARCH AND DEVELOPMENT

Sauermann products and services are backed by cutting-edge facilities and expertise: a team of over 20 experts working at multiple testing and calibration laboratories worldwide, and production lines in France the United States and China.

Our in-house research and development program — spearheaded by a young, forward-looking group of 20 engineers and 10 technicians — has three aims: to push the boundaries of innovation in ergonomic design, digital technology and connected objects, to patent our technologies, and to consistently set new standards for electronic and mechanical performance in our products.

800 m² of laboratory space

Our experts provide maintenance, adjustment and calibration services for our measurement instruments.

Customer service staff trained by our experts

Our team is here to advise and quote you for the service you need.

After-sales service

Our technicians maintain and repair you devices right where they're made.

Over 20 patents, including our oscillating piston pump technology and the foldable frame system found on our DBM 620 air flow meter.

Our measurement expertise covers a wide range of fields:

Pressure	Air flow
Temperature	Gas analysis
Hygrometry	Light measurement
Weight	Electrical current
Radiometry	Acoustics
Tachometry	Air quality (co ₂ , co)
Air velocity	PH-Meter

Overview of ranges

Transmitter sensors

Pressure / Temperature / Humidity / Air velocity and air flow / Air quality / Solar / Light / Atmospheric pressure

Designed and manufactured in France, Sauermann and Kimo's range of transmitters can be used in all industries, in the service sector or in OEM.

From the simplest to the most elaborate, these advanced measuring instruments can be adapted to any type of application thanks to their configuration and calculation possibilities.

KII Monostats

HVAC and Indoor Air Quality Commercial - Industrial - OEM

- 1 measured parameter
- 1 x 3 A 230 V_{AC} changeover relay

Class 110

HVAC and Indoor Air Quality Commercial - Industrial - OEM

- 1 to 2 measured parameters
- 1 or 2 analog outputs 0-10 V / 4-20 mA

Large commercial sector - Industrial environment

- 1 to 2 parameters
- Calculation functions
- 2 x 3 A 230 V_{AC} changeover relays
- 2 analog outputs 0-10 V / 4-20 mA

Class 310 / 320

Industrial environment - Clean rooms

- Multifunction
- 2 to 4 analog outputs
- Up to 4 relays
- Ethernet communication
- MODBUS protocol

STABILITY

Monostats

HVAC and Indoor Air Quality - Commercial - Industrial - OEM

Temperature / Humidity / Differential pressure / CO level / Air quality

Quick to install and simple to set up, the monostats trigger an alarm when a preconfigured threshold is exceeded, then send this information via a relay. The alarm can be set simply using the onboard push button or using the LCC-S software, compatible with the Monostats, 110, 210 and 310 ranges.

PST Manostats Differential pressure

- From ± 100 Pa to ± 2000 mbar

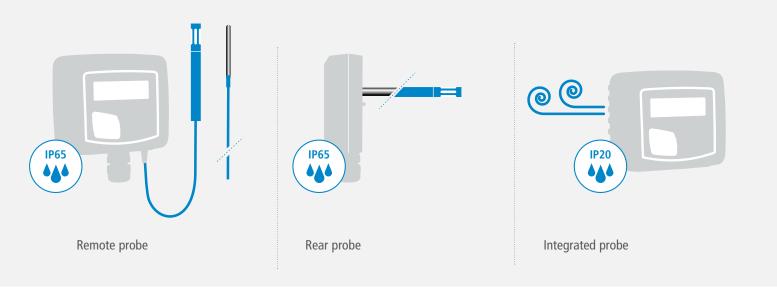

Simplified calibration

The electronic board and measuring element are integrated into the front of the sensor, which allows you to leave the installation intact to configure or calibrate your devices.

Monostats / Class 110

CO2ST mounted in the air handling unit of an industrial infrastructure.

CO2ST CO₂ stats CO₂ concentration

- From 0 to 5000 ppm

HST Hygrostats Humidity

- From 5 to 95 %RH
- From -20 to +80 °C

COST CO stats CO concentration

- From 0 to 500 ppm

TST Thermostats Temperature

- From -100 to +400 °C

ESSENTIAL

Class 110

HVAC and Indoor Air Quality - Commercial - Industrial - OEM

Temperature / Air Quality / Light / Solar / Pressure / Atmospheric pressure **Humidity / Air velocity**

The Class 110 covers a wide range of measurement parameters.

This transmitter range delivers a current or voltage signal. To suit different applications, the sensors are available as ambient, remote or rear mounted probes. The analogue outputs automatically adapt to the measurement scale configured via switches on the device or via the LCC-S software.

TH 110 Temperature / Humidity

- From 5 to 95 %RH
- From -20 to +80 °C

1 or 2 analog outputs

Indispensable for calibration laboratories, the CP 116 measures atmospheric pressure.

*CP 111 only

CP 110

Differential pressure

The CP 110 transmitter sensors are characterised by their reliability, high accuracy and high long-term stability. For example, they are particularly suitable for the following applications: ventilation and air-conditioning systems, control technologies based on atmospheric or differential pressure, and all types of climate monitoring.

CP 111: from -100 to +100 Pa, with solenoid valve

CP 112: from -1000 to +1000 Pa

CP 113: from -10,000 to +10,000 Pa

CP 114: from -500 to +500 mbar

CP 115: from -2000 to +2000 mbar

CP 116: from 800 to 1100 hPa

The CP 112 connected to a Debimo device mounted in a ventilation duct. Our Debimo accessories for air flow measurement on page 17.

TM 110 **Temperature**

- From -100 to +400 $^{\circ}$ C

CO 110 / CO 112

Air Quality

- CO: from 0 to 500 ppm
- CO₂: from 0 to 5000 ppm

CTV 110 Air Velocity

- From 0 to 30 m/s
- From 0 to +50 °C

HM 110 Humidity

- From 5 to 95 %RH

Rear and remote models.....IP65
Ambient modelIP20

LR 110 Light

- From 0 to 10,000 lux

- From 0 to 1500 $\mbox{W/m}^2$

Monitoring of solar panels' efficiency

ADVANCED

Class 210

Large service sector - Industrial environment

Temperature / Humidity / Pressure Air quality / Air velocity and Air flow

Some very demanding sectors (medical technology, food processing, nuclear, high-tech industry, etc.) require certified instruments that can measure several parameters simultaneously, such as temperature, CO₂, differential pressure or air velocity.

allowing them to send up to two alarms directly to automated systems.

KIMO

V OK ESC

EXPERT

Si-C320

Industry - Laboratories

The Sauermann Si-C320 is an evolution of the KIMO C 310.

For clean rooms, regulated environments and industrial VAC applications where a perfect regulation/monitoring of the air parameters is needed, our Si-C320 transmitters provide reliable measurements and allow you to achieve compliance with the strictest regulations.

The Si-C320 housing is waterproof, rugged and resistant to vaporised hydrogen peroxide (VHP). It also features a colour touch screen for comprehensive viewing and advanced control of measurement parameters.

In addition, measurements can be recorded and downloaded via the Sauermann Control application/software.

ESSENTIAL MODELS:

Si-C320-D	With display
Si-C320-D-50	With display and -50 to 50 Pa differential pressure module included
Si-C320-D-250	With display and -250 to 250 Pa differential pressure module included
Si-C320-D-1000	With display and -1000 to 1000 Pa differential pressure module included
Si-C320-D-10000	With display and -10,000 to 10,000 differential pressure module included

Other configurations of Si-C320 transmitters are available, please contact our Sales for further information.

2 inputs for interchangeable probes

4 visual and audible alarms

4 configurable analog outputs

Multifunction device for VAC and IAQ applications

VHP resistant ABS IP66 housing

Touch screen

1 x RS485 interface for MODBUS RTU protocol

Wireless interface for mobile App

Air Change Rate calculation

Sauermann leverages KIMO's 45 years expertise legacy and keeps on perfecting the art of measurement!

Si-CPE320

Designed for clean rooms and regulated environments

The Sauermann Si-CPE320 is an evolution of the KIMO CPE 310.

For clean room applications, the Si-CPE320 is a panel transmitter with minimal impact on the internal layout of the working environment. Its front face is made of a high-grade stainless-steel waterproof with an integrated touch screen. Equipped with the same technologies as the Si-C320, this panel-mounted version provides state-of-the-art reliability and accuracy.

In addition, measurements can be recorded and downloaded via the Sauermann Control application/software.

IP66 VHP resistant 316L stainless steel front a

1 x input for external probe

3 configurable analog outputs

3 visual and audible alarms

AVAILABLE VERSIONS:

Si-CPE320	Optional wireless communication module
-----------	--

Si-CPE320-W

Integrated wireless communication module

Typical applications include:

Si-C320 Monitoring of drying processes in industrial manufacturing (bricks, pasta...)

Si-C320 and **Si-CPE320** Monitoring and regulation of differential pressure, relative humidity, temperature, air velocity and ACR in cleanrooms, operating rooms, etc.

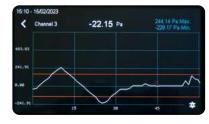

Si-CPE320 Air parameters monitoring in glove boxes, fume hoods, isolation cabinets, vial filling machines, etc.

NEW TECHNOLOGIES

Touch control and mobile application

Full device setup

Touch screen

No physical buttons: better sealing and less mechanical

Simultaneous display of up to 4 measurements
Chart form display

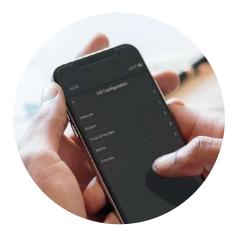

Full device setup

Trend indicator: up to 4 parameters displayed simultaneously

History: chart display

Sauermann Control app

It is also possible to control and configure the Class 320 transmitters with a computer, a smartphone or a tablet via the Sauermann Control application, which allows the user to manage all the device's parameters via its wireless connection module (USB wired for computers). This app can also easily update the firmware of the instrument and its probes.

- Wireless connection with iOS and Android
- Full device control
- Downloading recorded measurements
- One-click firmware update
- Remote measurement viewing

ACCESSORIES

Unlimited modularity

The right accessory for every requirement

Wireless communication module	Configuration of transmitters using Sauermann Control mobile app
USB/mini-DIN interface	Connect transmitters to configuration PC software
Power supply	24 V _{AC} /V _{DC}

More than 50 kits and accessories are available on demand: junctions, AC and DC power supplies, cables and extensions, adapters, protections, mountings, etc.

Mounting plates
In stainless steel and DIN rail mounting kit
(except ambient)

External protectionAgainst solar radiation and rain fall

PVC, silicone, PFA cables Stainless steel hose with or without shielding Cable clamps Mounting brackets

Connectors and thermowells

Temperature converters

AIR FLOW ACCESSORIES

Class 110, 210, 310, 320 Compatible

DEBIMO measuring blades (air velocity / air flow)

Pitot tube with integrated temperature probe

SQR3 function: calculation of the air velocity and air flow in the duct via differential pressure measurement.

SOFTWARE SOLUTION

Monitoring system

Clean rooms and regulated environments

Compatible with Monostats, Class 110, 210, 310 and 320

real-time monitoring.

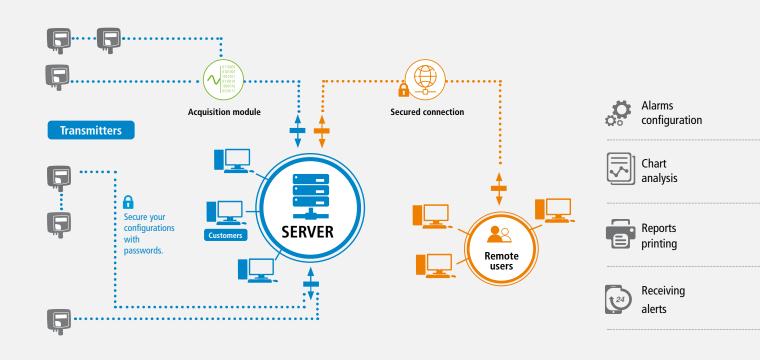

Intuitive interface

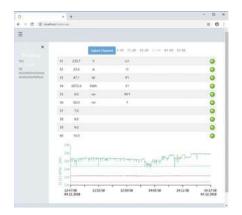

Sauermann offers a state-of-the-art software solution for data acquisition environment monitoring. This monitoring system collects measurements from Sauermann transmitters is compliant with the FDA 21 CFR Part 11.

Depending on their assigned rights, users will be able to view measurements, receive alerts or set up alarms, via a secured connection.

RS-485

4-20 mA

Ethernet

Pt100

New generation probes

High accuracy, stable and reliable long-term measurements with Class 320

Plug & Measure

Changing the probe is quick and easy. Automatic recognition.

Humidity - Temperature - Air velocity - Air quality - Differential pressure

The latest technology for your measurements

Internal differential pressure modules

- Autocalibration via solenoid valve
- Temperature compensation from
- -10 to 50 °C

Si-PRO-U-W

Flush mounted humidity and temperature probe

- For being used in clean rooms
- VHP resistant, stainless steel body

Si-PRO-U-I-100-H

Heated humidity and temperature probe

- Heated probe
- Resistant against pollution

COMPARISON

A total of 16 probes are available to order from our Customer Service.
